"A remarkably entertaining and informative read, *The Phone Book* will be hard for both kids (and adults) to put down. From cover to cover, it is packed with great information written in a language that does not speak down to kids, and I love that Speer tackles the most important topic first—"Why Tech Companies Want You Staring at Your Phone." The Phone Book really should be required reading for any child about to get a connected device. I have a feeling they will even thank you for it."
